

# Freelance Developer

**Helping people develop their ideas into websites and apps that help them succeed**

Work With Me

# Services I Offer

---

## Website Building

From Landing pages, to multi-page websites. I can build whatever you need to get your business noticed online.

## Full Stack Application

If you need something that includes a full back-end and front-end, I can help design and make your idea come to life.

## Build an API

I specialize in APIs built with Java and Spring Framework.

## Custom Ideas

Have something that doesn't quite fit what I offer. Feel free to schedule a consultation and I will see if I can still help you or give you some guidance

# Projects I've Built

---

## LFG Website

Technologies Used:

React, Redux, Nodejs, Webpack, Typescript

Summary:

An LFG site is where gamers can go to find someone to help them with their quests
